## ABOUT THIS GUIDE

Informatics for Integrating Biology and the Bedside (i2b2) is one of the sponsored initiatives of the NIH Roadmap National Centers for Biomedical Computing (<http://www.bisti.nih.gov/ncbc/>).

One of the goals of i2b2 is to provide clinical investigators broadly with the software tools necessary to collect and manage project-related clinical research data in the genomics age as a cohesive entity; a software suite to construct and manage the modern clinical research chart. This guide along with the provided database scripts will help you learn how to install the i2b2 data package.

# 1. PREREQUISITES

## 1.1. Required Software

The i2b2 webclient and i2b2 application has been installed

### 1.1.1. New Installations

1. Copy folder `/SCILHSDiseaseRequest` into the `{root http}/webclient/js-i2b2/cells/plugins/standard` folder
2. Add the following (bold) lines to the `/webclient/js-i2b2/i2b2_loader.js` in order to add the plugin to the analysis tool list:

[..]

```
i2b2.hive.tempCellsList = [
```

[..]

```
  { code: " SCILHSDiseaseRequest",
```

```
    forceLoading: true,
```

```
    forceConfigMsg: { params: [] },
```

```
    forceDir: "cells/plugins/standard"
```

```
  },
```

[..]

## LICENSE
